SKILLS

Programming, *Python, SQL, Java, C++, Shell Scripting*

Cloud Platforms, *Microsoft Azure, Google Cloud Platform (GCP), AWS*

Data Engineering & Big Data, *Databricks, Apache Spark, BigQuery, Apache Airflow, Hadoop, Hive*

Data Visualization & BI, *Power BI, Tableau, D3.js*

Machine Learning & AI, *TensorFlow, Keras, Natural Language Processing (NLP), Regression Models, LLM Applications*

DevOps & DataOps, *CI/CD, Git, GitHub Actions, Databricks Asset Bundles*

Data Platform & Governance, *Unity Catalog, Data Quality Controls*

Databases & Data Warehouses, *IBM DB2, SQL Server (SSMS)*

Cloud Infrastructure, *Terraform, Azure Networking, Private Endpoints, NSG Rules, IAM/RBAC*

Work Experience

08/2025 – Present

Assistant Manager, Data Engineer, *Prudential BSN Takaful Berhad*

- Led and mentored a team of data engineers, driving delivery across BAU operations and strategic projects supporting customer- and agent-facing applications.
- Designed and implemented real-time data replication using Qlik Replicate, reduced 20-minute latency to near real-time streaming, significantly improving data freshness for operational analytics and downstream use cases.
- Managed Azure cloud infrastructure using Terraform, including Network Security Group (NSG) inbound/outbound whitelisting, Private Endpoint enablement, IAM/RBAC, storage, and secure networking configurations for data platforms.
- Developed and optimized ETL pipelines in Azure Databricks using Apache Spark and Delta Lake, supporting scalable data processing and analytics workloads.
- Implemented CI/CD pipelines using GitHub Actions in collaboration with MLOps teams, improving deployment automation, version control, and environment consistency.
- Collaborated with governance and security teams to implement Informatica data lineage and quality controls, integrated Checkmarx security scanning in CI/CD pipelines, and managed Azure Network Security Group (NSG) policies for secure data access.
- Maintained production data pipelines and platform operations, ensuring reliability, monitoring, and timely issue resolution.

01/2025 – 07/2025

Consultant, Senior Data Engineer, *Raizon Consulting Sdn Bhd*

- Gathered and translated business requirements into scalable data engineering solutions on Azure Databricks.
- Developed ETL pipelines using Databricks, Apache Spark, and Delta Lake to process and transform large-scale enterprise datasets.
- Implemented Power BI Row-Level Security (RLS) policies to enforce role-based access control for sensitive business data.
- Contributed to Databricks Unity Catalog migration, transitioning legacy Hive Metastore assets to a centralized governance framework with structured catalogs and schema-level permissions.
- Performed effort estimation and technical planning to support project delivery timelines and data platform enhancements.

01/2023 – 12/2024
Kuala Lumpur,
Malaysia

Consultant, Data Engineer,

Pimato Group Sdn Bhd (Formerly known as BIIT Consulting Sdn Bhd)

- Developed and maintained ETL pipelines for enterprise data platforms, integrating multiple data sources into centralized storage systems for analytics and reporting.
- Continued development of a telecommunications data platform on Google Cloud Platform (GCP) using Dataflow, Apache Airflow, and Google Cloud Storage (GCS) for large-scale data ingestion and processing.
- Implemented and maintained Airflow DAGs to orchestrate batch data pipelines, automating daily and scheduled data processing workflows.
- Developed Shell scripts to support pipeline automation.
- Migrated legacy Excel-based reporting processes to SAS-based automated data pipelines, improving reliability and scalability.
- Designed data transformation logic and validation processes to ensure accuracy and compliance for financial reporting datasets.
- Collaborated with cross-functional teams including data architects, in-house data engineers, and business stakeholders to deliver scalable data solutions.

06/2022 – 12/2022

Data Analyst, BIIT Consulting Sdn Bhd

- Design and optimize data models in BigQuery to support analytical and reporting needs.
- Write efficient SQL queries to retrieve and manipulate data in BigQuery.
- Create and manage data pipelines using Apache Airflow for automated data ingestion, ETL processes, and data delivery.
- Ensure reliable scheduling, monitoring, and troubleshooting of data pipelines.
- Implement data quality checks, validation processes, and data governance practices to maintain data accuracy and consistency.
- Collaborate with cross-functional teams, including data architect, data engineer, and business stakeholders, to understand data requirements and deliver solutions.

04/2021 – 06/2021
Kuala Lumpur,
Malaysia

Data Analyst Intern, BIIT Consulting Sdn Bhd

- Contributed to a data migration initiative from on-premise databases to Google Cloud Platform (GCP) for a telecommunications client.
- Developed and optimized SQL scripts for data migration and transformation, scheduled through Apache Airflow DAGs for automated daily execution.
- Utilized Git for version control and collaborative development within the data engineering team.
- Assisted in onboarding and guiding new team members to support successful project deployment.

Projects

11/2024 – 05/2025

Data Model Development in Databricks, Insurance

- Developed and maintained ETL pipelines in Databricks using Apache Spark and Delta Lake to support enterprise data processing.
- Leveraged Apache Spark and Delta Lake to ensure data accuracy, reliability, and scalability.
- Collaborated with stakeholders to meet business requirements and ensure alignment with organizational goals.
- Documented workflows and provided knowledge transfer sessions to improve team adoption and operational efficiency.

08/2023 – 01/2024

SAS EG Migration Project, Banking Industry

- Implemented an automated Liquidity Coverage Ratio (LCR) reporting system, reducing manual processing and improving regulatory reporting accuracy for Bank Negara Malaysia (BNM) submissions.
- Migrated legacy Excel-based reporting workflows to SAS Enterprise Guide pipelines, improving scalability and maintainability.
- Led a comprehensive migration project transferring data processes from Excel to SAS Server, streamlining data handling and enhancing accessibility and scalability.
- Designed and implemented efficient ETL (Extract, Transform, Load) workflows within SAS EG environment, optimizing data flow and integrity.
- Worked with business users to resolve data quality issues and establish standardized governance practices.

06/2022 – 06/2024	Cloud Data Warehouse Migration, Telecommunication • Collaborated within a team to facilitate the migration of a Vertica datamart to Google Cloud Platform (GCP). • Reverse-engineered legacy Vertica SQL logic and reimplemented optimized queries in BigQuery SQL. • Designed and implemented ETL pipelines orchestrated with Apache Airflow for daily, weekly, and monthly data loads. • Orchestrated the encapsulation of BigQuery SQL jobs within Apache Airflow to streamline and automate data processing workflows. • Conducted thorough data testing to validate the accuracy and integrity of the retrofitting process to ensure it meets the desired goals and requirements. • Managed data model change requests and enhancements to support evolving business requirements.
05/2021 – 05/2022	Camera View Recommender, Final Year Project • Developed a deep learning model with Single Shot Detector (SSD) with MobileNetV2 to predict aesthetic view of an image. • The proposed model has achieved State-of-the-Art (SOTA) accuracy and outperform benchmark model in user study

Education

04/2019 – 05/2022 Cyberjaya, Malaysia	Bachelor of Computer Science (BSc CS Hons.) majoring in Data Science, Multimedia University • CGPA: 3.85 • Merit Scholarship holder • Dean's List Awarded
--	--

Certificates and Achievements

03/2026 – Present	Databricks Certified Data Engineer Associate 
12/2024 – present	Certified Pega Decisioning Consultant 
08/2024 – present	Microsoft Certified: Azure AI Fundamentals 
12/2023 – 12/2026	AWS Certified Cloud Practitioner 
07/2023 – present	Confluent Fundamentals Accreditation 
03/2023 – present	Google Cloud Skills Boost Badges 
10/2021 – present	AWS Academy Graduate – AWS Academy Cloud Foundation
